

HEALTHCARE

Every contract in a hospital is tied to something important. **IT** often doesn't know which suppliers comply with NIS2. **Procurement** gets involved too late when acquiring equipment. **Facility** juggles separate contracts for maintenance and installations throughout the whole hospital, where a missed deadline isn't just inconvenient, it's risky for patient safety. Contract management is therefore not an administrative detail here, but a crucial topic with direct impact on compliance, continuity, and the quality of care.

CHALLENGES in the healthcare industry

- Hospitals manage complex operations across 400+ beds and many departments, each with its own contracts to follow up.
- No central archive, contracts are scattered everywhere. Contracts get lost in shared drives, inboxes, filing cabinets, or held by department heads.
- Unclear responsibilities and manual follow-up. Ownership is often informal, tracked in someone's inbox or head rather than a system.

Situation **WITHOUT** Contractify

- Procurement enters the negotiation without the information needed to prepare or lead it properly.
- Key addenda sit disconnected from the main contract, with no clear owner.
- Critical deadlines, SLA's and notice periods go unmonitored.

Situation **WITH** Contractify

- **One central repository** in which every department works the same way, including defined read access and responsibilities.
- Never miss a deadline. **Automatic reminders** before end dates, notice periods, and key obligations.
- **Streamlined workload and time saving.** Find any file or contract detail instantly with smart search filters and clear summaries.

IMPACT on the organisation

1. **Relieve medical staff:** focus on “core business”
2. **No more hidden costs** due to unwanted tacit renewals
3. **Efficient collaboration** and communication
4. **Faster approval and signing process**

What is the best contract management **STRATEGY** for your business?

Let's find out together! Schedule a call with our Contractify expert, Ruben, to get a professional analysis & solution tailored to your organisation's and industry's needs.
