MEET RAAL LA LOUVIÈRE...

a **Belgian football club,** playing in green and white. The club currently has around **33 permanent employees** working full-time to ensure the good operation of the football club from La Louviére. RAAL is a **rising star** from the lower divisions in Belgium. Since 2017, they have already risen 3 divisions. They are currently building a completely new stadium.

CHALLENGES FOR OPERATIONS & ADMIN

- Managing contracts in general and the **paperwork** it caused. The previous system involved a lot of printing and scanning.

- Getting the right people to sign the right contracts at the right time. These **internal arrangements** were hard to maintain.

- **Keeping track of important contract data**. The main challenge was making sure to never miss a contract deadline and so avoiding **unnecessary costs or waste of time.**

HOW DID THEY TRY TO SOLVE THIS BEFORE CONTRACTIFY?

- **Excel tracking files** with all the data of the contract. These documents kept track of the status of the contracts each time and adjusted as needed.

- **Printing contracts**, signing them on paper, scanning them to send them back and repeating this process.

HOW DID THEY SOLVE THIS WITH CONTRACTIFY ?

- One central database with **extensive filters** where they can **upload and find contracts in record time.**

- **Proactive notifications** when approaching a contract deadline.

- **Remote signing**, instantly downloading a signed copy of the contract.

IMPACT ON BUSINESS

1. **Perfect overview** of all contracts and related documents

2. **Getting contracts signed in no-time** due to fluent signing flows

3. **Piece of mind** thanks to automated deadline reminders

4. **Easy contract follow-up** instead of complex internal arrangements
